

The enclosed forms are to be completed for injuries resulting from rollovers, high impact crashes or any other accident causing injury for competitors only.

ROLLOVER/IMPACT CRASH PROCEDURE

If a roll over or an impact crash occurs and the driver is visibly un-injured -

the driver may continue with the remainder of the race but **must** report to the ambulance/medic immediately after the race has finished to be checked and given clearance to continue for the next round

If the driver appears **injured** –

The driver must cease racing and report to the ambulance/medic immediately to be assessed

Only when clearance is given by the ambulance/medic can the driver continue racing

In all instances a 'Medical Assessment' form must be completed (this can be completed in retrospect in cases of emergency).

In non emergency situations if the ambulance/medic assesses the driver and decides they should stand down from further competition the driver must take their paperwork and speak to the Clerk of the Course.
